User Privacy Choices for Play IPTV Player

As a user of the Play IPTV Player app, your privacy is important to us. Here are the choices and controls available to you regarding your data:

Analytics and Usage Data: Our app utilizes Firebase Analytics to collect anonymized technical data, such as device type and app usage statistics. This data does not identify you personally. If you prefer to limit this data collection, you can adjust your device settings or opt out within the app if available.

Crash Reporting: We use Crashlytics to help improve the stability of our app by automatically collecting data on app crashes. This data is anonymized and does not contain personal identifiers. You can opt out of crash reporting in your device settings.

Account Data: As our app does not require you to create an account, we do not collect personal account data. You have full control over any IPTV account details you enter into the app, and we do not access or store these details.

Content Choices: Our app does not provide or host content. You have complete control over the IPTV content you access through your account. We do not monitor or take responsibility for this content.

App Store Settings: For additional privacy settings, please refer to your device's or the App Store's privacy options, where you can manage permissions and data sharing preferences for apps installed on your device.

Contact Us: If you have questions or concerns about your privacy choices or how we handle data, please contact us at contact@rthlabs.com
